

About Us

The "AIDS Orphans Aid China" is a non-for-profit members association registered in Cologne, Germany. It was founded in 2004 by 20 students of the China department of the university of Cologne, and quickly financially supported by family members, friends, teachers and other students. To date, members and supporters come from all over Germany. By backing locally managed projects, we help orphans in central China, currently mostly in Anhui province. -> Our Aims All of our active members work on an honorary basis. We meet on average twice a year to plan our activities. These include events and campaigns informing about the local situation and recent developments, trying to win the support of more people, and raising funds to extend our project activities in China. We always welcome new members! -> Support us. Please feel invited to browse our website for information on our -> Projects to learn more about how we help orphans in China. Have a look in the ->Gallery for some pictures of our activities. You can also follow us on Twitter, join us on Facebook, or check out our Youtube Channel. If you like online shopping use the chance to benefit our work with Boost - simple and effective!
